

Accelerated Path to M.S. Degree

- Qualified students earn a B.S. and M.S. degree in 5 years of study.
- Students enter the graduate program in their 4th year of study.
- Increasing number of employers are looking for candidates who have an advanced degree, where a B.S. degree used to be sufficient.
- Advanced degrees generally increase your earning potential and allow you to enter a specialty field.
- The Combined BS/MS degree provides the breadth and depth of knowledge and skills necessary to become successful in this field.
